Do we have a free market economy or a state controlled economy? Since it is supposed to be the former, then this bill should not even stand a chance. It is clearly being introduced to keep old technology alive and to stifle innovation and fair competition. This will only benefit the NAB and its members, while hurting the consumer by limiting their choices. Why should the NAB be permitted to behave in a monopolistic fashion when Microsoft is not? I am paying for a service that does not violate any laws and yet the an organized lobby group is attempting to determine what I should be able to purchase. This is my right not theirs. Hopefully you will do the right thing and send the NAB packing.

Thank you,

David Sprowls
